

MTSS/RtI Change Model: Measuring Progress

(Marzano, Waters, McNulty, 2005)

Implementation Drivers

Stages of Implementation

Focus	Stage	Description
Should we do it!	Exploration/Adoption	Decision regarding commitment to adopting the program/practices and supporting successful implementation.
Work to do it right!	Installation	Set up infrastructure so that successful implementation can take place and be supported. Establish team and data systems, conduct audit, develop plan.
Work to do it better!	Implementation (Initial and Full)	Try out the practices, work out details, learn and improve before expanding to other contexts.
	Elaboration	Expand the program/practices to other locations, individuals, times- adjust from learning in initial implementation.
	Continuous Improvement/Regeneration	Make it easier, more efficient. Embed within current practices.
